CRIME IN SOUTH CAROLINA

2002 ANNUAL REPORT

INITIAL FIGURES FOR THE YEAR 2002
FINAL FIGURES FOR THE YEAR 2001

COMPILED BY THE STATE LAW ENFORCEMENT DIVISION
UNIFORM CRIME REPORTS DEPARTMENT

S. C. STATE LIBRARY

NOV 6 2003

STATE DOCUMENTS

PLEASE NOTE

Figures used in this report are submitted voluntarily by law enforcement agencies throughout South Carolina. Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between jurisdictions due to the existence of numerous factors which affect the amount and type of crime from place to place. Some of these factors are listed in the report. It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

SOUTH CAROLINA LAW ENFORCEMENT DIVISION

MARK SANFORD
Governor

ROBERT M. STEWART
Chief

October 27, 2003

Crime in South Carolina - 2002 Annual Report, contains information regarding crime in our state and provides initial figures for 2002, and final figures for 2001. We hope that this report will be used by the public and professionals alike to better understand the character of criminal acts.

I would like to thank the law enforcement personnel and agency heads in South Carolina whose cooperation and contributions made this report possible.

Robert M. Stewart, Chief
South Carolina Law Enforcement Division

An Accredited Law Enforcement Agency

P.O. Box 21398 / Columbia, South Carolina 29221-1398 / (803) 737-9000 / Fax (803) 896-7041

DEDICATION

This book is dedicated to all law enforcement officers, and in particular to the ones who died while upholding the laws and serving the citizens of South Carolina.

The following officers died in the line of duty during 2002:

Lance Corporal Dana Lyle
Beaufort County Sheriff's Office

Sergeant Walter Floyd
Clarendon County Sheriff's Office

Corporal Dyke Allen
Beaufort County Sheriff's Office

Lieutenant Russell Wiles
Elloree Police Department

Private First Class Marion Wright, II
Berkeley County Sheriff's Office

Senior Trooper Michael Rao
S.C. Highway Patrol District 5 - Florence

Private First Class Dennis LaPage
Charleston Police Department

Patrolman First Class Joseph McGarry
Myrtle Beach Police Department

Corporal Kenneth Johnson
S.C. Highway Patrol District 6 – Charleston

Patrolman William Bell
Summerville Police Department

**SOUTH CAROLINA
UNIFORM CRIME REPORTING PROGRAM**

BACKGROUND OF UNIFORM CRIME REPORTING

NATIONAL UCR PROGRAM

Development of the current nationwide Uniform Crime Reporting (UCR) Program began over fifty years ago. In 1930, crime counts were first requested from local police departments with the Federal Bureau of Investigation (FBI) designated by Congress to collect, compile and analyze the statistics. The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) played a primary role in the origin and development of UCR and today serves in a strong advisory capacity. Standardized offense classification and counting procedures developed by the IACP are the basis for the UCR program. The National Sheriffs' Association (NSA) also serves in an advisory role to the national program. The publication, Crime in the United States, is the annual report published by the FBI dealing with national crime statistics.

In recent years the FBI has actively assisted states in the development of state level UCR programs compatible with the national system.

SOUTH CAROLINA UCR PROGRAM

South Carolina was one of the first states to implement an operational state UCR program. The South Carolina Law Enforcement Division is the agency administering the program. The information collected and the uniform classification under which it is collected are based directly upon the guidelines developed by the IACP and FBI.

Upon initiation of the South Carolina UCR program in July, 1973, SLED, in conjunction with the FBI, held workshops around the state to instruct or refresh the county and city law enforcement agencies on the scope of the program and the mechanics of completing the forms.

Since that time, SLED, along with the local law enforcement agencies, has instituted an incident-based records management system which has greatly enhanced and improved the quality of information gathered under the Uniform Crime Reports system. Under this procedure, crime data and other information gathered by municipal and county law enforcement agencies are collected and submitted to SLED on a daily, monthly and annual basis. This new system lent itself to a more complete and accurate crime reporting system which, in most instances, alleviated some of the paperwork with which many departments had been burdened. An additional advantage of using standard incident and booking reports was realized from the uniformity of documents. Standardized reports facilitated the exchange of information between law enforcement agencies within the state. The forms have been included in the report writing classes taught at the South Carolina Criminal Justice Academy.

In 1991 South Carolina became one of the first states to implement the new National Incident Based Reporting System (NIBRS) which was developed by the FBI, using our state as a model and demonstration site. The NIBRS is an enhanced version of the previous South Carolina system and is currently in various stages of implementation in other states. The system is expected to be in nationwide use in a few years.

OBJECTIVES

The fundamental objectives of the South Carolina Uniform Crime Reporting Program are:

- (1) To inform the governor, legislature, other governmental officials and the public as to the nature of the crime problem in South Carolina.
- (2) To provide law enforcement administrators with criminal statistics for administrative and operational use.
- (3) To determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.
- (4) To provide base data and statistics to help measure the workload and effectiveness of the criminal justice system.
- (5) To provide base data for research to improve the efficiency, effectiveness and performance of criminal justice agencies.

A particularly important goal of the state UCR program is to return statistical information to the contributors. With implementation of the new incident reporting system, participating police agencies furnish data that are classified, coded, and then returned to each jurisdiction in the form of monthly printouts. The information enables them to make decisions in budgeting, manpower allocations and the identification of high crime areas.

This information is also forwarded by SLED to the FBI on a monthly basis for inclusion in the FBI's annual UCR publication.

REPORTING AND CLASSIFICATION

In reporting offenses to the Uniform Crime Reports program, crimes are classified according to standard definitions that are used throughout the nation (given in later sections of this publication). The UCR definitions are designed to insure that offenses with different titles under the laws of the various states are appropriately classified and counted under the UCR program. Crimes are classified without regard to the findings of courts or juries, since the statistics are gathered primarily to assist in identifying areas of concern to law enforcement officers, and not meant to reflect the outcomes of inquests, hearings or trials.

CRIME FACTORS

Each year when Crime in South Carolina is published, many entities - news media, tourism agencies, and others with an interest in crime in our State, compile rankings of cities and counties based on their Crime Index figures. These simplistic and/or incomplete analyses often create misleading perceptions which adversely affect cities and counties, along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which,

while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of the Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its composition by age and gender, education levels, and prevalent family structures are some factors to be considered in assessing and better understanding the crime issue.

The National League of Cities provides information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its economic dependence on nonresidents (such as tourists and convention attendees), its proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement. More detailed information can, of course, be obtained from a city's or county's chamber of commerce, planning/information office, or other similar entity.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors. For example, one city may report more crime than a comparable one, not because there is more crime, but because its law enforcement agency through proactive efforts, such as "sting operations," identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible about how to categorize and quantify the nature and extent of crime in South Carolina. Valid assessments are only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which are known to affect the volume and type of crime occurring from place to place are:

Population density and degree of urbanization with size of locality and its surrounding area.

Variations in composition of the population, particularly youth concentration.

Stability of population with respect to residents' mobility, commuting patterns, and transient factors.

Modes of transportation and highway system.

Economic conditions, including median income, poverty level, and job availability.

Cultural factors, such as educational, recreational, and religious characteristics.

Family conditions with respect to divorce and family cohesiveness.

Climate.

Effective strength of law enforcement agencies.

Administrative, investigative, and reporting emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).

Citizens attitudes toward crime.

Crime reporting practices of citizenry.

Crime in South Carolina gives a statewide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. **The reader is, therefore, cautioned against comparing statistical data of individual cities, counties, or universities solely on the basis of their population coverage.**

SOUTH CAROLINA CRIME INDEX

The tabulation presented in the tables, graphs, and charts in this publication indicate the volume, fluctuation, and distribution of crime in South Carolina on the basis of a crime index. The crime figures are categorized by agency, county and state on the basis of information submitted by police agencies from these areas. The seven offenses comprising the crime index are:

- | | | | |
|-----------|-----------------|-------------------------|---------------------|
| 1. Murder | 3. Robbery | 5. Breaking or Entering | 7. Motor Veh. Theft |
| 2. Rape | 4. Agg. Assault | 6. Larceny | |

Definitions of these seven offenses can be found elsewhere in this book under their separate headings.

The crime index is used as a basic measure of crime. The crimes were selected for use as an index on the basis of their serious nature, their frequency of occurrence, and the reliability of reporting from citizens to law enforcement agencies. The offenses of murder, rape, robbery and aggravated assault are categorized as violent crimes. Offenses of breaking or entering, larceny and motor vehicle theft are classed as nonviolent crimes. The crime index is the total of these offenses that come to the attention of law enforcement agencies.

In reviewing crime index figures, the reader should bear in mind that there is currently no way of determining the total number of crimes committed. The crime index has been established to measure only the instances of crime which come to the attention of law enforcement agencies. It is important to remember in reviewing the tables and graphs in this report that the volume of crime in

a given area or municipality is related to the crime factors previously listed in this report.

CRIME RATES

The crime rate indicates the number of Index Crimes per unit of population, generally per 10,000. It should be noted that the rate only takes into consideration the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given community. The effect of changes in population on rates should be kept in mind when attempting to make a comparison of crime rates.

The population data used in this report are supplied by the State Data Center, Division of Research and Statistical Services. For the twenty year Crime in South Carolina Rates per 10,000 population table, found on pages 16-17, U.S. Bureau of the Census preliminary population estimates for South Carolina are used for the years 1983-1989, rounded to the nearest thousand. S.C. Division of Research and Statistical Services population estimates as of July 1 of each year are used for the years 1990-2002, rounded to the nearest thousand, unless noted otherwise.

PERCENT CHANGE

Changes in the numbers of offenses and arrests from year to year are shown in a number of tables in the publication. The percent change shown after any figure reflects a comparison to information reported the previous year.

PERCENT ROUNDING

Percentages shown in this publication may not add to 100 due to gross rounding (usually shown to the nearest tenth, but sometimes to the nearest whole). Percentages under 0.5 are shown as zero percent on all pie charts.

UPDATED DATA **INITIAL AND FINAL FIGURES**

In 1991, the SC Incident Based Reporting System (SCIBRS) adopted in toto the conventions of the FBI's National Incident Based Reporting System (NIBRS). One of those conventions was the NIBRS Time Window for adding, updating, and correcting crime data reported to the state and national repositories.

Prior to 1991, under the old Summary Based UCR rules, any additions, updates, or corrections to figures for the previous year had to be made by adjusting the numbers reported during the current year. E.g., If an agency had one actual murder during a month in the current year, but then learned of another murder that had actually occurred in the previous year, then that agency would report two murders for the current month. It quickly becomes clear that this method of reporting updates negatively affects the accuracy of crime counts in both the current year and the previous year. When the increased detail of NIBRS data over UCR data is considered, the issue of accuracy is compounded.

With the adoption of the concept of the NIBRS (and SCIBRS) Time Window it became possible to freely add, update, or correct any data for an incident that occurred during the current calendar year and the previous calendar year (usually referred to as "current year minus one").

Therefore, for purposes of this annual crime report, the data for the most recent year is to be considered as "initial" data - it is still open to additions, updates, and corrections. Data for previous years is to be considered "final", since those years have passed outside the Time Window and can no longer be adjusted.

SOME 2001 AND 2002 DATA NOT AVAILABLE

Due to abbreviated collection of data for the years 2001 and 2002, some data usually found in this report are not available. Where data are not available for tables and graphs displaying trends, the notation "N/A" appears.

Tables not appearing in this report are "Clearances" and "County Clearance Rates", and several tables in the "Law Enforcement Officers Assaulted" section.

Sections not appearing in this report are "Other Forcible Sex Offenses" and "Domestic Assaults". (Note: Rape data are available as usual. Also, some domestic assault data can be found in the Aggravated Assault section.)

SCIBRS returned to normal data collection procedures for the year 2003.

DEFINITIONS

INDEX	The index, or crime index, consists of the counts used as indicators of the crime picture in a given jurisdiction (state, county, city). The index does not include counts of all crimes reported, but uses seven categories (murder, rape, robbery, aggravated assault, breaking or entering, larceny and motor vehicle theft) as pointers or indicators of the overall crime situation. Crimes in the index are selected according to their hierarchy position.
HIERARCHY	<p>The hierarchy system, or crime hierarchy, selects crimes according to their ranking or seriousness. When using the hierarchy system to obtain crime counts, only the most serious category of crime is counted in any single criminal incident. The hierarchy order of the index is murder, rape, robbery, aggravated assault, breaking or entering, larceny, and motor vehicle theft.</p> <p>For example, if a criminal event includes both a murder and rape, only the murder will be counted in the index.</p>
INCIDENT	An incident is a single criminal event. One incident may include several categories of crimes, multiple victims, and multiple offenders.
VICTIM	A victim, in this publication, is an individual person who has had a violent crime committed against him or her. (In other contexts, but not in this report, a business or organization may be described as a victim.) Victims, here, are described by age, sex, and race.
OFFENDER	An offender, in this publication, is a person who has committed a crime, but who may or may not have been arrested. Offenders are described to police by victims and witnesses of crimes by age, sex, and race. (Offenders are sometimes called subjects or suspects, but those terms are not used in this report.)
PERSONS ARRESTED	A person arrested is someone who has been apprehended by law enforcement officers for committing one or more crimes. A juvenile is counted as a person arrested if he or she is apprehended or otherwise officially handled by law enforcement officers for committing one or more crimes, regardless of whether the juvenile is incarcerated or even formally charged.

NOTICE TO THE READER

NIBRS REPORTING

South Carolina was the first state to publish an annual report using the new National Incident Based Reporting System (NIBRS). NIBRS is currently being developed in other states, and in a few years may replace the old UCR system. While this Crime in South Carolina limits itself primarily to the usual Index that has been used for years, there are some differences in the way crimes are counted in certain tables. These are outlined below.

HIERARCHIED DATA

The hierarchy system dictates that only the most serious crime in any incident may be counted. For instance, if a single incident reported a murder, a rape, and a robbery, only the murder would be counted. Unless otherwise noted, the crime counts have been tallied according to the national hierarchy system, the same as in previous years. This provides continuity in the trends.

INDIVIDUAL INDEX CRIME SECTIONS

The counts for the tables within the individual crime sections (Murder, Rape, Robbery, etc.) vary according to whether the table is showing the number of weapons, premises, vehicles, or victims.

In order to provide greater detail, another factor that affects the counts in some of these tables is that the information has not been subjected to the old UCR hierarchy system. These tables often reflect different counts than the index tables, since all crimes in a given category are counted without regard to hierarchy.

VICTIM AND ARRESTEE TABLES

The counting methodology has been changed for the victim and the arrestee tables found in the index crime sections for Rape, Robbery, Aggravated Assault. (pages 34,35,44,45,54,55), and the Arrestee tables for Breaking and Entering, Larceny, and Motor Vehicle Theft (pages 64,70, and 78). The 2002 counts for these eleven tables have not been subjected to the "hierarchy rule". All victims and arrestees linked to these crimes and arrests are now counted.

S. C. CRIME INDEX DATA

**SOUTH CAROLINA
CRIME CLOCK
2002**

one
INDEX CRIME
every 2 minutes
25 seconds

one
VIOLENT CRIME
every 15 minutes
18 seconds

one
NONVIOLENT CRIME
every 2 minutes
52 seconds

one
MURDER
every 28 hours, 55 minutes

one
Forcible Rape
every 4 hours, 21 minutes

one
ROBBERY
every 1 hour, 29 minutes

one
AGGRAVATED ASSAULT
every 20 minutes

one
BREAKING OR ENTERING
every 12 minutes

one
LARCENY
every 4 minutes

one
MOTOR VEHICLE THEFT
every 31 minutes

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the index crimes. This mode of display should not be taken to imply a regularity in the commission of the index crimes; rather, it represents the annual ratio of crime to fixed time intervals.

2000-2002 CRIME INDEX TRENDS

Offense	2000	% Change	2001	% Change	2002	% Change
Murder	297	+4.1	320	+7.7	303	-5.3

MURDER

DEFINITION

Murder is defined as the willful (non-negligent) killing of one human being by another, except those cases classified as justifiable homicides. Under the UCR definition, justifiable homicides are specifically limited to the killing of an offender by a police officer in the line of duty, or the killing, during the commission of a serious crime, of a criminal by a private citizen. This definition does not take into consideration the findings of coroners' juries, or other courts. Suicides are not defined as murder under UCR. Attempts to commit murder are classified as aggravated assaults.

2002 SUMMARY

A total of 303 murder victims was reported in the 2002 crime index. During this year, the number of murders decreased 5.3 percent compared to those reported in 2001.

There were 295 persons arrested for murder statewide in 2002.

Murders accounted for 0.9 percent of all violent crimes and 0.1 percent of the total crime index. The index murder rate in South Carolina was 0.74 per 10,000 persons.

The age group 17-24 accounted for 44.7 percent of persons arrested for murder. Males represented 89.5 percent of the total arrests made for murder.

Firearms were used in 66.0 percent of the murders, cutting instruments in 10.8 percent, hands and feet in 6.3 percent, other weapons in 11.9 percent, and unknown weapons in 4.9 percent.

Victims were known to have been using alcohol at the time of the offense in 3.5 percent of the cases, drugs in 0.3 percent, and alcohol and drugs in 1.0 percent.

Offenders were known to have been using alcohol at the time of the offense in 10.1 percent of the cases, drugs in 2.1 percent, and alcohol and drugs in 1.4 percent.

2000-2002 MURDER INCIDENTS BY PREMISE

FORCIBLE RAPE

DEFINITION

Forcible Rape, by UCR definition, is the carnal knowledge of a person forcibly or against that person's will, or when a victim is mentally or physically incapable of giving consent. Attempts to commit rape are included in this category. One offense is counted for each victim of rape. Statutory rapes and other types of sexual assaults are not counted as rape under the UCR program.

2002 SUMMARY

There were 2,016 forcible rapes reported in the 2002 crime index. During this year, rapes increased 14.3 percent compared to those reported in 2001.

There were 771 persons arrested for forcible rape statewide in 2002.

The number of forcible rapes committed per 10,000 persons was 4.9 statewide. The rate per 10,000 females was 9.6, based on a state female population projection of 2,103,200, as of July 1, 2002.

Of all persons arrested for rape, 66.5 percent were 34 years of age or younger. With regard to race, 45.4 percent were white, 54.0 percent were black, and 0.6 percent were other races.

Of the total rapes reported in 2002, approximately 8.5 percent were attempted.

Victims were known to have been using alcohol at the time of the offense in 9.7 percent of the cases, drugs in 1.2 percent, and alcohol and drugs in 1.1 percent.

Offenders were known to have been using alcohol at the time of the offense in 12.2 percent of the cases, drugs in 1.2 percent, and alcohol and drugs in 1.7 percent.

The relationships of victims to offenders within the family represented 16.8 percent of the total, outside the family but known to the victim 59.0 percent, strangers 15.4 percent, and unknown relationships 8.6 percent.

2002 RAPE INCIDENTS BY PREMISE

ROBBERY

DEFINITION

Robbery, for UCR purposes, is defined as the unlawful taking of the property of another through the use or threat of force. Robbery is a violent crime in which the element of personal confrontation between the victim and offender is present. Attempts to rob are included in the robbery count. Armed robberies, those involving weapons, and strong-arm robberies, those not involving weapons, make up the two major categories. One robbery is counted for each distinct operation, regardless of the number of victims present at the time.

2002 SUMMARY

There were 5,914 robberies reported in the 2002 crime index. During this year, robberies decreased 0.8 percent compared to those reported in 2001.

There were 1,668 persons arrested for robbery statewide in 2002.

Robberies accounted for 17.2 percent of all violent crimes and 2.7 percent of the total crime index.

The robbery rate in South Carolina was 14.4 per 10,000 persons.

The age group 17-21 accounted for 37.2 percent of persons arrested for robbery, followed by 36.3 percent for 22-34 years of age. Males represented 92.6 percent of the total arrests made. Of all persons arrested for robbery, 24.6 percent were white, 75.3 percent were black, and 0.1 percent were other races.

Firearms were used in 50.7 percent of all robberies, cutting instruments in 8.3 percent, hands and feet in 30.6 percent, other weapons in 5.5 percent, and unknown weapons in 5.0 percent.

The greatest number of robberies reported for any premise type occurred on streets and highways, accounting for 29.1 percent of the total.

2002 ROBBERY INCIDENTS BY PREMISE

AGGRAVATED ASSAULT

DEFINITION

Aggravated Assault, for UCR purposes, is defined as an unlawful attack by one person upon another with the intent of inflicting serious bodily injury. Aggravated Assaults are frequently accomplished through the use or threatened use of dangerous weapons. However, assaults resulting in serious injury from the use of hands or feet are also counted in this category. Attempts to assault are counted here since it is not necessary that injury result whenever a dangerous weapon is employed. Attempts to commit murder are classified under this category. One offense is counted for each victim of aggravated assault.

2002 SUMMARY

A total of 26,110 aggravated assaults was reported in the 2002 crime index. During this year, aggravated assaults increased 5.0 percent compared to those reported in 2001.

There were 9,459 persons arrested for aggravated assault statewide in 2002.

Aggravated assaults accounted for 76.0 percent of all violent crimes and 12.0 percent of the total crime index.

The aggravated assault rate in South Carolina was 63.6 per 10,000 persons.

The age group 25-34 accounted for 25.9 percent of persons arrested for aggravated assault. Males represented 77.7 percent of the total arrests made. Of all persons arrested for this offense, 41.4 percent were white, 58.2 percent were black, and 0.4 percent were other races.

Firearms were used in 20.8 percent of all aggravated assaults, cutting instruments in 20.5 percent, hands and feet in 24.3 percent, other weapons in 32.1 percent, and unknown weapons in 2.3 percent.

Victims were known to have been using alcohol at the time of the offense in 11.9 percent of the cases, drugs in 0.2 percent, and alcohol and drugs in 0.2 percent.

Offenders were known to have been using alcohol at the time of the offense in 16.6 percent of the cases, drugs in 0.5 percent, and alcohol and drugs in 0.9 percent.

2002 AGGRAVATED ASSAULT INCIDENTS BY PREMISE

BREAKING OR ENTERING

DEFINITION

Breaking or Entering, for UCR purposes, is defined as the unlawful entry of a structure with intent to commit a serious crime or theft. It is not necessary that force be used in gaining entry in order for the offense to be classified as an unlawful entry. Neither is it necessary that property loss occur for the crime to be counted in this category. Attempts to unlawfully enter a structure are also counted. One offense is counted for each distinct operation.

2002 SUMMARY

A total of 42,829 breaking or entering offenses was reported in the 2002 crime index. During this year, breaking or entering offenses increased 3.3 percent compared to those reported in 2001.

There were 4,790 persons arrested for breaking or entering statewide in 2002.

Breaking or entering accounted for 23.3 percent of all nonviolent crimes and 19.6 percent of the total crime index.

The breaking or entering rate in South Carolina was 104.3 per 10,000 persons.

The age group 17-21 accounted for 31.2 percent of persons arrested for breaking or entering. Males represented 90.6 percent of the total arrests made. Of all persons arrested for this offense, 48.7 percent were white, 50.8 percent were black, and 0.4 percent were other races.

There were 42,829 breaking or entering offenses reported in 2002. Of these 5.7 percent were attempts to commit breaking of entering.

2002 BREAKING OR ENTERING INCIDENTS BY PREMISE

LARCENY

DEFINITION

Larceny, for UCR purposes, is defined as the unlawful taking of the property of another without the use of force or fraud. Larceny does not have the element of unlawful entry. This offense category includes such crimes as shoplifting, purse-snatching, stealing items from vehicles and the like. Larceny does not include thefts by fraud, forgery, embezzlement or similar crimes. Motor vehicle thefts fall under a separate category and are not counted as larcenies. Attempts to commit larceny are included in this category. One offense is counted for each distinct operation, regardless of the number of victims.

2002 SUMMARY

A total of 124,059 larceny offenses was reported in the 2002 crime index. During this year, larcenies decreased 1.1 percent compared to those reported in 2001.

There were 17,856 persons arrested for larceny statewide in 2002.

Larcenies accounted for 67.5 percent of all nonviolent crimes and 56.9 percent of the total crime index.

The larceny rate in South Carolina was 302.1 per 10,000 persons.

Persons under the age of 17 accounted for 18.4 percent of those arrested for all categories of larceny. Arrests of males accounted for 65.4 percent of the total.

Shoplifting thefts accounted for 13.8 percent of the larceny category, while thefts from motor vehicles made up 23.2 percent, thefts of motor vehicle parts and accessories 9.0 percent, and thefts from buildings 5.8 percent.

2002 LARCENY INCIDENTS BY PREMISE

MOTOR VEHICLE THEFT

DEFINITION

Motor Vehicle theft, for UCR purposes, is defined as the theft of a self-propelled vehicle that runs on the surface of the land but not on rails. Motor vehicles include automobiles, trucks, motorcycles, and the like. One offense is counted for each vehicle stolen. This category does not include boats, farm equipment, tractors, bulldozers, etc. Motor vehicle theft does not include using a vehicle without the owner's consent if prior consent or lawful access has been granted. Obtaining vehicles through fraud or failure to return rented vehicles are not included in this category. Attempts to steal motor vehicles as well as "joyrides" are counted as motor vehicle thefts.

2002 SUMMARY

A total of 16,785 motor vehicle thefts was reported in the 2002 crime index. During this year, motor vehicle thefts increased 1.7 percent compared to those reported in 2001.

There were 1,004 persons arrested for motor vehicle theft statewide in 2002.

Motor vehicle thefts accounted for 9.1 percent of all nonviolent crimes and 7.7 percent of the total crime index.

The motor vehicle theft rate in South Carolina was 40.9 per 10,000 persons.

Of all persons arrested for motor vehicle theft, 81.9 percent were 34 years of age or younger. With respect to race, 45.3 percent were white, 54.3 percent were black, and 0.4 percent were other races.

There were 16,785 motor vehicle thefts reported in 2002. Of these, 4.6 percent were attempted motor vehicle thefts.

2002 SUMMARY

During 2002, five South Carolina police officers were murdered in the line of duty.

On Tuesday, January 8, 2002, 37 year old Corporal Dyke "A.J." Coursen and 45 year old Lance Corporal Dana Lyle Tate with the Beaufort County Sheriff's Office were shot and killed as they entered a mobile home in response to a domestic disturbance call. The suspect apparently ambushed the officers, once they were inside. Corporal Coursen and Lance Corporal Tate had eleven and ten years of law enforcement experience, respectively.

On Saturday, January 19, 2002, 38 year old Charleston City Police Department Private First Class Dennis Elisha LaPage was shot and killed while working an off-duty assignment at a local college dorm, by a fleeing suspect who was involved in a traffic accident where he had just fatally shot an EMT and severely injured another who went to the accident scene to assist. He had more than six years of law enforcement experience.

On Sunday, July 7, 2002, 38 year old South Carolina State Trooper Corporal Kenneth J. Johnston was shot and killed in Berkeley County. Trooper Johnston was supervising a road Safety Checkpoint which included three other SCHP Troopers. The suspect vehicle approached the checkpoint and stopped while the female driver presented her identification. Corporal Johnston approached the male passenger from the right side, when the passenger shot him. Trooper Johnston had over twelve years of law enforcement experience.

On Sunday, December 29, 2002, 28 year old Myrtle Beach Police Department Patrolman First Class Joseph J. McGarry, Jr. on-duty in his marked police vehicle, stopped at an all night eatery to get coffee. Another on-duty officer Mike Guthinger stopped at the same time. They observed a person outside in the parking lot whom McGarry knew to be the suspect in a recent homicide. The two officers approached the suspect to "pat him down" for weapons. The suspect, who had his back to the officers, suddenly turned around, produced a handgun and fired two shots killing Officer McGarry.

2002 SUMMARY

During 2002, there were 318 aggravated assaults upon law enforcement officers.

There were 213 aggravated assaults on officers cleared by arrest, amounting to a clearance rate of 67.0 percent statewide.

Of the 318 officers assaulted, 15.5 percent were assaulted with firearms, 7.5 percent with cutting instruments, 34.0 percent with other weapons, 42.2 percent with hands, fists, etc, and 0.8 percent with unknown weapons.

Some degree of injury was sustained by 46.0 percent of officers assaulted.

Of the 318 aggravated assaults on officers, 39.6 percent occurred between the hours of 8:00 PM and 4:00 AM.

NOTE TO THE READER

The information shown on these pages is based upon Aggravated Assaults against police officers, and will bear the notation "(Aggravated Only)". Unlike previous years, Simple Assaults are not available for 2002. Officer assault information is not available for the year 2001.

2002 OFFICERS ASSAULTED BY PREMISE

SOUTH CAROLINA ARREST DATA

ARREST DATA

The Uniform Crime Reports Program requires a daily reporting of data concerning persons arrested in the state. Records of arrests for criminal acts in all crime classes are received from state, county and municipal law enforcement agencies in South Carolina and are classified by offense category and arranged according to age, sex and race of persons arrested. Traffic arrests, except driving under the influence, are not reported. A total of **221,931** arrests for all crimes was reported during **2002**. Unlike previous years, arrest data is not available for **2001**.

A person is counted on the arrest report each time he or she is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to differences in local arrest procedures and policies. It should be noted that a person may be arrested several times during a given month for different offenses. This occurs frequently for such crimes as public drunk, disorderly conduct and similar violations. A juvenile is counted as "arrested" when the circumstances are such that, if he or she were an adult, an arrest would be counted when law enforcement or other official action is taken beyond a mere interview, warning or admonishment.

When reviewing arrest figures, it should be remembered that arrest counts do not reflect the specific number of persons arrested since, as has been pointed out, one individual may be arrested several times during any given month or year. However, arrest data are useful in measuring the extent of law enforcement activity in a given geographical area, as well as in providing an index for measuring involvement in criminal acts by the age, sex and race of the offenders.

Analysis of reported arrests for the year **2002** indicates that **16.2** percent of arrests during the year were for Index offenses (murder, forcible rape, robbery, aggravated assault, breaking or entering, larceny, and motor vehicle theft). Arrests for larceny comprised the highest percentage of Index arrests, amounting to **49.8** percent, while arrests for bad checks comprised **14.5** percent of Non-Index arrests. Persons arrested for alcohol and Drug violations (drug laws, DUI, liquor laws, drunkenness) accounted for **28.6** percent of all arrests made during the calendar year **2002**.

NOTE TO THE READER

Prior to 1991, the UCR program did not have a specific category for drug equipment violations. Such arrests were counted under "All Other". From 1991 forward, all "Drug Law" arrest counts will include those arrests for drug equipment and paraphernalia violations.

**SOUTH CAROLINA
ARREST CLOCK
2002**

one
ARREST
every 2 minutes, 22 seconds

one
INDEX CRIME ARREST
every 14 minutes, 40 seconds

one
VIOLENT INDEX CRIME ARREST
every 43 minutes, 6 seconds

one
**NONVIOLENT INDEX CRIME
ARREST**
every 22 minutes, 13 second

one
NON-INDEX CRIME ARREST
every 2 minutes, 49 seconds

The arrest clock should be viewed with care. Being the most aggregate representation of arrest data, it is designed to convey the annual reported arrest experience by showing the relative frequency of occurrence of all arrests. This mode of display should not be taken to imply a regularity in arrests; rather, it represents the annual ratio of arrests to fixed time intervals.

CRIME AND ARREST DATA BY COUNTY

COUNTY CRIME RATES

County crime rates per 10,000 population are shown in the table below. The crime rates are based upon the latest population estimates available from the State Data Center, division of Research and Statistical Services, as of April 1, 2002. County population projections are based upon a State population total of 4,107,000 for 2002, and are rounded to the nearest hundred. Therefore, county population totals may not add to the state total due to rounding.

CRIME BY COUNTY AND AGENCY

NOTES

1. Dashes (--) beside a year indicate that this agency did not submit crime data for the year shown.
2. Months in parentheses indicate that this agency submitted fewer than 12 months of crime data in the year 2002. The number of months shown - E.g. (__ months) – indicate the number of months submitted.
3. A plus sign (+) indicates that the agency was not in existence during the year shown.

***Notes on Index offenses reported by departments other than county and municipal law enforcement agencies.**

Many state-level law enforcement agencies have specialized missions directed toward the enforcement of crimes not included in the national index used here. These specialized agencies or components include the SC Highway Patrol, the State Transport Police, the SLED Vice Unit, the SC Forestry Commission, and the SC Department of Natural Resources. While the specialized priorities of the agencies result in many arrests and in the investigation of many offenses, the vast majority of Index offenses are reported by county and municipal agencies. In most cases, when state agencies assist local law enforcement, the incidents and arrests are reported by the county or municipal agency having local jurisdiction within each county.

For the reasons stated above, it is the practice in this report to omit publishing these five agencies individually in each of the forty-six counties, thereby avoiding the addition of 230 lines of data that would show very few Index offense counts. The total Index offense counts submitted by these agencies for 2001 and 2002 are shown below.

State	Year	Murder	Rape	Robbery	Agg. Assault	B & E	Larceny	MVT	Index Total
Agencies	2001				11	1	2	1	15
	2002				1	0	1	0	2

2002
AGENCIES COVERED BY COUNTY LAW ENFORCEMENT CRIME REPORTS

Bethune (6) *	Donalds (12)	Pelzer (12)
Briarcliffe Acres (7)	Graniteville (12)	Piedmont (12)
Carlisle (12)	Gray Court (12)	Ravenel (12)
Chappells (12)	Heath Springs (12)	Salem (12)
